

FIT Roofing & Construction

Texas · Contact: Mike

Active services: Dominate SEO, Social Media

Client operations

Website development, maintenance and conversion QA

Own or support website development and maintenance, conversion improvements, technical fixes, site performance and user-experience reviews. Review responsive behavior, functionality, forms, tracking and client-facing polish.

Coordinate SEO implementation

Coordinate on-page work, technical fixes, internal linking and content implementation with the team.

Delivery visibility, blockers and reporting inputs

Track deliverables and deadlines, provide weekly progress visibility and monthly reporting inputs, and surface blockers early to Bradley/team. Track website and conversion fixes discovered during campaign/SEO reviews without inventing a fixed monthly count.

Dominate SEO

Technical SEO monitoring & fixes

Monitor indexing and technical health, and implement fixes throughout the month. This is an ongoing responsibility, not an arbitrary monthly completion count.

Organic performance and conversion opportunities

Monitor organic performance and conversion opportunities throughout the month. Contribute observations to reporting and implementation.

Social Media

Scheduling and publishing

Prepare and publish planned social content against the approved calendar.

Brand consistency and content quality

Maintain brand consistency across posts and perform content quality control.

Engagement and performance monitoring

Monitor engagement and performance; adjust content based on performance as required.

Planned setup — on hold

LSA verification and setup blocked

Second background-check reset was in progress. Support readiness checks and conversion-focused LSA setup once verification clears. No recurring numerical LSA deliverables are active for this client. Activation requires explicit verification confirmation.

In The Light Roofing

Allentown / Lehigh Valley, Pennsylvania · Contact: Bryce

Active services: Dominate SEO, Local Services Ads, Google Ads

Client operations

Website, landing pages and conversion paths

Maintain and improve website and landing pages supporting organic/paid traffic; improve conversion paths and review responsive behavior, performance, forms and tracking.

Coordinate Dominate SEO implementation

Implement content, on-page SEO, technical fixes and internal linking. Focus on roof repair/replacement/near-me search intent around Allentown.

Calls, forms and conversion tracking

Check that calls and form submissions are measurable and useful for reporting, alongside LSA lead quality and answered/missed-call observations.

Escalations and weekly/monthly reporting inputs

Escalate campaign and website issues quickly. Provide clear team/client updates, weekly snapshots, monthly reporting inputs and conversion observations. Surface blockers early to Bradley/team.

Dominate SEO

Technical SEO monitoring & fixes

Monitor indexing and technical health, and implement fixes throughout the month. This is an ongoing responsibility, not an arbitrary monthly completion count.

Organic performance and conversion opportunities

Monitor organic performance and conversion opportunities throughout the month. Contribute observations to reporting and implementation.

Local Services Ads

LSA account, profile and verification monitoring

Monitor account and profile health and verification status; surface issues promptly.

Missed calls and lead quality

Monitor missed/answered calls and lead quality; dispute invalid leads as required.

Speed-to-lead and conversion monitoring

Monitor response speed and lead conversion; surface conversion blockers.

Google Ads

Campaign, spend and conversion monitoring

Review campaign performance, spend and conversions on the existing Monday/Friday rhythm. These checks support, but do not double, the supplied weekly numerical deliverables.

Keyword, targeting and ad-performance management

Manage keywords, targeting and ad performance; monitor search intent.

Waste reduction and issue response

Identify wasted spend, reduce waste, and respond to campaign or tracking issues as required.

Water Automation / aquaHALT

US / product-led · Contact: Greg & Amy

Active services: Dominate SEO

Client operations

Website implementation, UX and conversion improvements

Support technical/development implementation, website fixes and UX/conversion improvements. Review responsive behavior, performance, functionality, forms and tracking.

Buyer-intent SEO implementation

Implement on-page recommendations, internal links, metadata/content changes and technical SEO fixes. Support the buyer-intent audiences and topics recorded in the client notes.

Blog formatting, publishing and page connections

Format and publish blog content; connect blogs to relevant service/product pages and verify branding and responsive presentation.

SEO progress, blockers and reporting inputs

Track SEO progress and blockers; supply weekly/monthly reporting observations and recommendations. Surface blockers early to Bradley/team.

Dominate SEO

Technical SEO monitoring & fixes

Monitor indexing and technical health, and implement fixes throughout the month. This is an ongoing responsibility, not an arbitrary monthly completion count.

Organic performance and conversion opportunities

Monitor organic performance and conversion opportunities throughout the month. Contribute observations to reporting and implementation.

Logic LC

Philadelphia HQ / nationwide; Essington / Philadelphia area · Contact: Joseph & Kevin

Active services: Standard SEO

Client operations

Website maintenance and approved positioning

Maintain and improve the website while preserving nationwide security/networking positioning and local Managed IT, VoIP and IT Consulting positioning.

Standard SEO implementation

Implement on-page SEO, internal linking, technical fixes and content updates within the Standard SEO scope. Publish and format approved content.

Responsive, accessibility and conversion QA

Check responsive behavior, accessibility, conversion paths, performance, functionality, forms, tracking and client-facing polish.

Standard SEO tracking and reporting inputs

Track Standard SEO deliverables and provide weekly/monthly reporting inputs. Surface blockers early to Bradley/team; never substitute Dominate SEO targets.

Standard SEO

SEO implementation and performance

Manage SEO implementation and performance throughout the month to support numerical deliverables. Technical health is addressed through the monthly Technical SEO Audit & Fixes cycle; do not count ongoing checks as extra cycles.
